

GageCarve® Metals

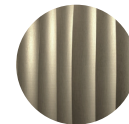

When your projects demand the wow factor, GageCarve® delivers the perfect blend of timeless sophistication and contemporary edge. Quality and durability are built into each individually crafted sheet of this richly textured metal. An environmentally responsible choice, GageCarve® is constructed of at least 50% post-consumer recycled aluminum. It is then anodized or powder coated to create a durable, corrosion-resistant finish. Choose from many dynamic designs.

MANY OTHER FINISHES & DESIGNS AVAILABLE:

C1001 Miami Nickel

C1004 Organic Champagne

C1005A Rough Cut Bronze
